An electric actuator designed for load requirements ranging from 800"lbs up to 1335"lbs. The actuator comes standard with two auxiliary switches (Form C), an internal low power heater, a NEMA 4X environmental rating, and in 120vac and 230vac supply voltages. The P2/3 mechanical connections are ISO5211 compliant. The P2/3 Series can be ordered as an on/off (two position) model that can be used in bump/jog applications as well. Models can also be ordered with an internal proportional control card that accepts a wide range of control signals and generates multiple feedback signals for field use.
### Application Notes:

1. These actuators are to be mounted ONLY between a horizontal and upright position.
2. When installing conduit, use proper techniques for entry into the actuator. Use drip loops to prevent conduit condensate from entering the actuator.
3. Both NPT conduit ports MUST use proper equipment to protect the NEMA 4X integrity of the housing.
4. The anti-condensate heater is to be used in ALL applications.
5. Do not install or store the actuator outdoors or in humid environments without power to the heater.
6. Use proper wire size to prevent actuator failure (see wire sizing chart).
7. Mechanical travel stops exist to prevent over-rotation for manual override only. They are not intended to stop motor driven rotation.
8. Do not parallel wire multiple actuators together without utilizing isolation relays! If this is your intention, please contact ProMation Engineering for a multiple actuator parallel wiring diagram.

### Switch Logic Map and Switch/Cam Arrangement

Switch sequencing data is provided in the table below to show the change-of-state points during the rotation of the actuator from OPEN to CLOSED and back again. The red bar indicates when that terminal makes with it’s respective common.

SW1 and SW2 are set at the factory and should NOT be changed. The INCLUDED auxiliary switches SW3 & SW4 are for terminals 7 thru 12 and those setpoints may be modified if need be. When so optioned, SW5 & SW6 auxiliary switches are initially set to function the same as auxiliary switches SW3 & SW4.

### Switch Logic Map

- **CW** denotes clockwise rotation.
- **CCW** denotes counter-clockwise rotation.
- The table above shows the state of each switch at specific angles.

**Switch Logic Map and Switch/Cam Arrangement shown**
**Wiring Diagrams for P2/3 Series**

- Field Control Device may be relay contact, Switch or Triac type.
- Pilot device 10A MAX. Auxiliary switches are rated 10A @ 250vac MAX.
- Terminals 7-12 are dry type Form C.
- Terminals accept 12-16ga solid/stranded wire.

**ProMation Premium Controller:**

The Premium controller offers a full array of features - such as various control and feedback signals, alphanumeric readout, several fault indicators for operational diagnostics, extensive data logging that provides full proportional control for all industrial applications. ModBus communications are also an option on this controller.

#### Proportional Control

**Full Proportional Control**

- Autocalibration
- Programmable
- High resolution
- Alarm Outputs
- Data logging
- Simple User Interface
- Field Selection Friendly
- Thermal Management

**Control Signal Inputs**

(Selectable using program menu):

- 0-10vdc, 1-5vdc, 2-10vdc, 4-20mA

Factory set with common isolated from ground. Ground reference is possible.

**Signal**

<table>
<thead>
<tr>
<th>Input Impedance</th>
<th>Sensitivity</th>
</tr>
</thead>
<tbody>
<tr>
<td>0-10vdc</td>
<td>140k ohms</td>
</tr>
<tr>
<td>1-5vdc</td>
<td>250k ohms</td>
</tr>
<tr>
<td>2-10vdc</td>
<td>140k ohms</td>
</tr>
<tr>
<td>4-20mA</td>
<td>250 ohms</td>
</tr>
</tbody>
</table>

**Feedback Signal Output**

(Can be different than input):

- 0-10vdc, 1-5vdc, 2-10vdc, 4-20mA

Max Load: 250 ohms

**Auxiliary Signal Output** (programmable):

- Alarm Contacts allow for signaling of 5 different fault conditions.
- 2 Position Control

Contacts and capability for 2 position (only) override of the actuator.
AVAILABLE OPTIONS (Factory Installed)

- Premium Proportional Controller Option. Converts 2 position to proportional control.
- Extended Duty Motor - 75% Duty Cycle.
- Single Wire Control Relay (Internal) Units operate NORMALLY CLOSED - ENERGIZE TO OPEN.
- Single Wire Control Relay (Internal) Units operate NORMALLY OPEN- ENERGIZE TO CLOSED.
- Mechanical Torque Switch Assembly. P2~P13 except P2/3 120/230PN4-AC series.
- IP68 Protection, tested to 0.7kgf/cm² for 72 hours. P2~P8 only.
- 0-45-90 degree rotation option.
- 0-90-180 degree rotation option. P2~P8 only.
- 0-180 degree rotation option. No Mid-point position is offered. (On/Off only). P2~P8 only.
- 1k ohm position feedback potentiometer.
- 5k ohm position feedback potentiometer.
- 10k ohm position feedback potentiometer.
- 4-20mA feedback generator for On/Off/Jog actuators.
- Auxiliary Switch set. Provides 3rd and 4th auxiliary switches (Form C x 2).
- Adjustable Timer, Dual Set Point Timer (Duration and Frequency) (Contact factory for application assistance).
- Proportional Control Signal override capability (OPEN OR CLOSED). P2~P13 Series only.
- Integral Thermostat for Heater Control - turns on at 32°F, turns off at 50°F.
- Cold weather auxiliary heater option. Thermostatically controlled, On 32°F, Off at 50°F, auto reset, hermetically sealed, 120/230vac On/Off/Jog type actuators. 175W Internal Heater, 2A power consumption.
- Timer function which slows actuator rotation (cycle time) using an internally mounted octal timer. (Contact factory for application assistance). P2 - P13 series only.
- Chain wheel override for applications where an actuator is mounted some distance from the floor. (Use with LCS).
- Local Control Stations (LCS) ProMation LCSs are designed to be remotely located or directly mounted to the actuator. Proportional actuators will have different options than On/Off. Available in steel, stainless, or fiberglass enclosures. (See catalog for additional Local Control Selections).
- 3 Phase models with or without Motor Control Center.
- Optional SCADA and Modbus compatability.
- Epoxy coating for increased environmental protection.
- Nylon coating for increased environmental protection.
- Stainless Steel enclosure. P1~P6 Only.

ProMation Product Line

**PL Series Linear Drive**
Up to 4400lbs down/up force and up to 100mm (4") stem travel

**P Series Non-Spring Return**
55"lbs through 40,000"lbs. Quarter-Turn, with Manual Override
Available with On/Off/Jog or Proportional control. For 12vac/dc, 24vac/dc, 120vac, 230vac, 230/3 phase, 380v/3 phase & 460v/3phase supplies.

**PA~PD Series Spring Return**
445"lbs through 2300"lbs. Quarter-Turn, both with and w/o manual override handwheel. Spring either CW or CCW. Available with On/Off control for 24vac/dc and On/Off or Proportional control for 120vac & 230vac supplies. Stepdown for 3phase available.

**PBU Battery Back-Up Systems**
Provides power sufficient to drive P Series actuators to field-selectable fail-safe positions. For P Series & PL Series actuators in On/Off and Proportional control modes. Available for 24/120/230vac actuators. 120vac/230 vac supply.

ProMation Engineering follows a policy of continual product updates and enhancements. Our website is the best place to obtain the latest product documentation, including the wiring diagrams for these controllers. Visit us at www.promationei.com or use the QR code below to link to the site.
